

Screening Checklist for Contraindications to Live Attenuated Intranasal Influenza Vaccination

PATIENT NAME _____

DATE OF BIRTH _____ / _____ / _____
month / day / year

For use with people age 2 through 49 years: The following questions will help us determine if there is any reason we should not give you or your child live attenuated intranasal influenza vaccine (LAIV, FluMist) today. If you answer “yes” to any question, it does not necessarily mean you (or your child) should not be vaccinated. It just means additional questions must be asked. If a question is not clear, please ask your healthcare provider to explain it.
